Agreement/Decision number	20192118
Project Title	Overcome our diversity

Abstract del progetto

Our project carries on the twinning project named “Calidlu” in the creation and exchange of good practices. It promotes the intercultural dialogue and the reciprocal comprehension to counteract the stigmatization of migrants and the more vulnerable and disadvantaged people, and to avoid situations of isolation. This topic is very touching for our territories, and for this reason we intend to permanently join forces in this field. Therefore, the project remembers the role of the EU on this topic; it organizes productive and non-discriminating debates also through the direct testimony of more fragile people; it shares and promotes tolerability and respect of common values; it testifies, explains and reassures the participants to this topic through meetings, activities and experiences; it encourages volunteering among young people to act in favor of the disadvantaged groups of populations. Our citizens are used to and interested in our activities about EU, and they actively take part in the realization of this project to make it a success of fraternity and tolerance and a stimulus to continue a permanent intercultural communication. Activities are: discussion with students about history and evolution of both the concept of EU and the migrations in Europe, about tolerance and respect of the common values of inclusion, so the civil life rules to favor integration; testimony of citizens from Third-Countries and with disabilities and of citizens who are part of those organizations that work with them, in order to think and discuss about the civil sense of integration and inclusion; exchange of good practices for inclusion and integration through sports and gastronomy. The expected results are: to facilitate comprehension and un-stigmatization, to promote the reciprocal comprehension and tolerance through the proposed activities, to allow any participant a cultural and human enrichment, to spread serenity about the topic of inclusion and integration.
